

OECD I LIBRARY USER PRESENTATION

15-Jan-21

1

About OECD

Established in 1961
Number of member countries: 36
Headquarters in Paris, France
Official languages: English and French

2

3

About the OECD

Mission:

- to promote policies that will improve the economic and social well-being of people around the world
- provide a forum in which governments can work together to share experiences and seek solutions to common problems
- measure, analyse, compare data, and set standards to predict future trends on a wide range of things
- recommend policies designed to make the lives of ordinary people better

4

4

Core values of the OECD

- **OBJECTIVE** : Our analyses and recommendations are independent and evidence-based.
- **OPEN** : We encourage debate and a shared understanding of critical global issues.
- **BOLD** : We dare to challenge conventional wisdom starting with our own.
- **PIONEERING** : We identify and address emerging and long term challenges.
- **ETHICAL** : Our credibility is built on trust, integrity and transparency

5

About OECD - Structure

15-Jan-21

6

6

About OECD's Data

- From where they are collected;
 - OECD member governments
 - Partner Non-member governments
 - International organisations

15-Jan-21

7

7

About OECD's Data

In order to compare internationally

- OECD has set international standards for data collection cooperating with other IGOs.
- Partner Governments and IGOs collect their data following those standards, and submit them to the OECD.

15-Jan-21

8

8

Current OECD hot topics

- PISA:
 - Evaluate education systems worldwide by testing the skills and knowledge of 15-year-old students
- Base Erosion and Profit Shifting:
 - G20 initiated project to understand the extent of large MNCs avoiding tax and to address the issue
- Sustainable Development Goals:
 - Alternatives to GDP as a measure of economic performance and social progress

9

Relevance of OECD to Singapore

11

11

About OECD iLibrary

- All reports, journals and working papers are available in PDF. Figures and tables in the file are downloadable in Excel.
- Interactive databases contain the data up to 1960s and 80 countries around the world.

15-Jan-21

12

12

About OECD iLibrary

- Content items (November 2020):

- 16 020 ebook titles
- 84 380 chapters
- 252 120 tables and graphs
- 2 450 articles
- 6 387 multilingual summaries
- 6 840 working papers
- 7 billion data points across 44 databases

What's New?

OECD Employment Outlook 2019 - The Future of Work

The 2019 edition presents new evidence on changes in job stability, underemployment and the share of well-paid jobs, and discusses the policy implications of these changes with respect to how technology, globalisation, population ageing, and other megatrends are transforming the labour market in OECD countries.

to area economy is growing robustly, and GDP growth is projected to remain in 2018 and 2019. These improved economic conditions should facilitate reforms needed to enhance euro area resilience to downturns and ensure its...

Fear the walking dead

Productivity growth is slowing down among OECD countries, coupled with increased misallocation of resources. A recent strand of literature focuses on the role of non-viable firms ("zombie firms") to explain these developments. Using a rich firm-level...

Inequalities in household wealth across OECD countries

This paper describes how household wealth is distributed in 28 OECD countries, based on evidence from the second wave of the OECD Wealth Distribution Database. A number of general patterns emerge from these data. First, wealth concentration is twice...

with the working-age population (15-64) declining at an annual rate of 1.1% since 2013, labour shortages are becoming more severe. The unemployment rate has fallen

Japan

Real wages have declined

The primary budget deficit is likely to continue under current policies²

1. Seasonally-adjusted data (three-month moving average) based on establishments with 30 or more workers.
2. Deflated by the consumer price index, excluding rent.
3. Government projections in January 2018. It assumes that the hike in the consumption tax rate from 8% to 10% is implemented as planned in 2019. The primary balance is central and local governments, as a percentage of GDP on a fiscal year basis.

DATA

30

Interactive databases

The screenshot shows the OECD.Stat Geobooks interface. On the left, there is a navigation menu with categories like 'General Statistics', 'Agriculture and Fisheries', 'Development and Population', and 'Environment'. The main area displays a table titled 'Geographical flows to developing countries' with columns for 'Year' (2007-2016) and 'Total CO2e flow'. The table lists various countries and regions, including 'Developing Countries, Total', 'Economic Total', 'Belgium', 'Belgium and Luxembourg', 'Canada', 'Former Yugoslav Republic of Macedonia', 'France', 'Germany', 'Spain', 'Turkey', 'United Kingdom', 'United States', and 'World of Germany, Total'. Annotations with red boxes point to the 'Customise table' button, the table's metadata section, and the 'Export' options.

31

Data of waste is included in the Environment Statistics.

33

Data of waste generated by industry

- Waste
 - Municipal waste DATA
 - Waste generation by sector DATA
 - Food Waste DATA

34

Data of waste generated by industry

The screenshot shows a data table titled 'Waste generation by sector'. The table has columns for 'Year' (2004, 2006, 2008, 2010, 2012, 2014, 2015, 2016) and 'Total'. The rows list various countries and their waste generation in thousands of tonnes. A red callout box points to the 'Variable' column, which contains the list of industries.

Variable contains the list of industries.

35

Data of waste generated by industry

The screenshot shows the 'Customize' dialog box. It contains a list of variables under the 'ISIC - Variable' section. Three numbered callouts provide instructions:

1. Click on "Unselect all".
2. Click on the tick boxes of the items to show data.
3. Click on "View Data" after selecting all items.

36

Data of waste generated by industry

Example: Amount of waste generated by the manufacture of plastic products.

Waste generation by sector

20-22: Manufacture of chemical, pharmaceutical, rubber and plastic products

Data sourced (3) used

This dataset shows data provided by Member countries' authorities through the questionnaire on the state of the environment (OECD/Eurostat), and to Eurostat through the Waste Statistics Regulation.

They were updated or revised on the basis of data from other national and international sources available to the OECD Secretariat, and on the basis of comments received from national Delegates. Selected updates were also done in the context of the OECD Environmental Performance Reviews. The data are harmonised through the work of the OECD Working Party on Environmental Information (WPEI) and benefit from continued data quality efforts in OECD member countries, the OECD itself and other international organisations.

In many countries systematic collection of environmental data has a short history; sources are typically spread across a range of agencies and levels of government, and information is often collected for other purposes. When interpreting these data, one should keep in mind that definitions and measurement methods vary among countries, and that inter-country comparisons require careful interpretation. One should also note that data presented here refer to national level and may not be statistically different.
